Machining Centres

Description

- 4-axis profile machining centre
- Designed for economical and efficient machining of aluminium and thin-walled steel profiles
- Standard version with air-cooled router spindle (version with water-cooled router spindle available optionally)
- All operations, such as routing, drilling and tapping, are performed while the profile bar is stationary to protect the profile surfaces
- Machining with all tools at angles continuously adjustable from -90° to $+90^{\circ}$
- Autonomous clamp positioning with absolute measurement system
- The on-board tool magazine ensures that tool changing times are kept short, thereby optimizing machining cycles
- The magazine can be equipped with eight tools
- Up to two rotating angle heads with two different tools are optionally available for double-bar and end machining (0° - 90° - 180° - 270°) (optional)
- Two separate working zones enable machining in shuttle operation (optional).

There is a central laser scanner on the operator's side to protect the area for maximum safety.

- 4-axis controller
- 18.5" colour display, USB ports and network connection
- Windows operating system
- eluCam
